DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Lines 1-2 of claim 1 call for the integrated circuit to comprise "a two-dimensional pyramid filter architecture" but architecture fails to define structure. Architecture does not produce output signals, note lines 4-12. Furthermore the architecture fails to be defined. Lines 7-12 call for producing "pyramid filtered output signals" but the structure that is necessary to produce these signals fails to be recited. The one and two dimensional filters of lines 8 and 10-11 fail to be related to the "architecture". The last three lines of claim 1 are the recitation of function without adequate structural basis. Claims 12, 16 and 20 contain deficiencies similar to claim 1.

Allowable Subject Matter

2. Claims 1-23 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Specification

3. A proper abstract is required.
